(57) Abstract :

ABSTRACT DISPOSABLE HEMORRHOID TREATMENT DEVICE This invention is directed to a medical device. A Disposable Haemorrhoid Device is the equipment used to achieve low temperature  $<35^{\circ}\text{C}$  for treatment of Hermorrhoids. Device is designed for the direct application of low temperature therapy. It is designed with consideration of human anatomy and medical concepts for treatment of this medical condition. The Device has a first section which is smooth blunt tip in bullet shape, a middle section which is in cylindrical body and end section is in oval disk shape with a flap at right angle for holding the device and apply pressure to insert the first section into the anal orifice. A Non Toxic, low thermal conductive Gel is filled in the device. For usage The Haemorrhoid Device is kept in a refrigerator Freezer at temperature  $-15^{\circ}\text{C}$  to  $-18^{\circ}\text{C}$  for 90 min. before use. This device is for onetime use. By this device the direct application of low temperature provides immediate relief to pain, itching and inflammation and Haemorrhoids.
